

Abraham Akinniyi O.

MEP Project Engineer with experience supporting electrical project execution, installation, inspection, testing, commissioning, and quality control. Skilled in site coordination, technical documentation, troubleshooting, and ensuring compliance with engineering, safety, and quality requirements. Strong foundation in electrical systems and project execution, with a practical, detail-oriented approach to delivering reliable engineering solutions.

CORE COMPETENCIES

- MEP Project Execution
- Site Coordination & Supervision
- Technical Documentation
- Engineering Drawings Interpretation
- Quality & Safety Compliance
- Team Collaboration & Coordination

PROFESSIONAL EXPERIENCE

MEP Project Engineer |

First Lakeside Technologies, Lagos State

August 2026 – Present

- Support electrical engineering and project execution activities across project sites.
- Assist with electrical installation, inspection, testing, and commissioning activities.
- Work under the supervision of senior engineers to gain practical site engineering experience.
- Assist with technical documentation, drawings, measurements, and project records.
- Support site coordination and monitoring of electrical works.
- Ensure assigned activities comply with safety, quality, and engineering requirements.
- Continuously develop practical knowledge of electrical systems, construction processes, and project execution.
- Participate in troubleshooting and identification of electrical installation issues.

Quality Control Officer

Nigerchin Electrical Development Company Limited, Lagos State

Apr 2023 – Oct 2023

- Conducted quality inspections and testing of electrical cables and related products.
- Performed cable testing to verify compliance with required technical and quality specifications.
- Assisted in identifying, investigating, and analyzing product faults and defects.
- Monitored production processes to ensure conformity with established quality requirements.
- Supported quality assurance and process improvement initiatives.
- Prepared and maintained technical and quality-control records.
- Collaborated with production and technical teams to resolve quality issues.
- Contributed to maintaining consistent product quality and compliance with applicable standards.

Quality Control Officer

Nigerchin Electrical Development Company Limited, Lagos State

Apr 2023 – Oct 2023

- Conduct quality inspections on raw materials and finished cable products, ensuring compliance with industry and international standards.
- Improved production quality by enforcing standardized testing procedures and quality benchmarks.
- Developed and implemented technical datasheets, enhancing documentation accuracy and traceability.
- Collaborated with production teams to reduce defects and improve overall process efficiency.
- Utilized ERP systems to optimize inventory management and production planning workflows.
- Performed cable fault analysis using locator devices, reducing product failure rates and improving reliability.

EDUCATION

B.Tech, Electrical & Electronics Engineering (Second Class Upper)

Ladoke Akintola University of Technology, Ogbomosho — Aug 2021

CERTIFICATIONS

- Graduate Member, Nigerian Society of Engineers (GNSE) — Aug 2021
- National Youth Service Corps (NYSC) Discharge Certificate — Aug 2022

ADDITIONAL VALUE

- Strong attention to detail with a track record of maintaining high-quality standards
- Ability to work in fast-paced industrial environments with minimal supervision
- Committed to continuous learning and engineering excellence
